Total	0.92	1.08

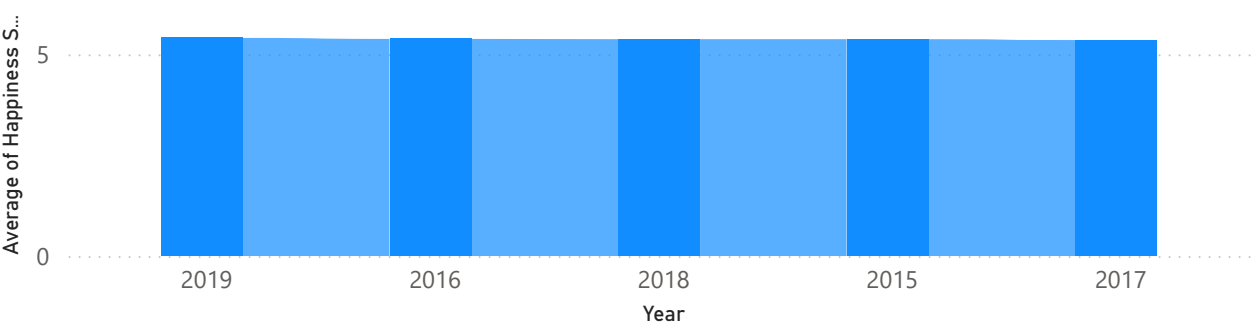

Average of Economy and Average of Happiness Rank by Economy

Average of Economy and Average of Family

Average of Happiness Score by Year

KEY FINDINGS

- **Global Overview:** The overall average happiness score is approximately **5.38** and the average happiness rank is **78.70**.
- **Regional Performance:** "Australia and New Zealand" consistently leads in average happiness scores, while regions like "Southern Asia" show lower average scores.
- **Economic Correlation:** The scatter plot reveals a clear negative correlation between economy and happiness rank; generally, as the "Average of Economy" increases, the "Average of Happiness Rank" decreases (meaning the country is ranked higher/better).
- **Economic vs. Family Contribution:** Across your dataset, "Average of Family" (approximately 1.08) contributes slightly more to the overall metrics than "Average of Economy" (approximately 0.92).
- **Trend Over Time:** The "Average of Happiness Rank by Year" shows some fluctuation, with an improvement (a lower rank number) observed around 2017 before stabilizing in subsequent years.
